Details of proposed research:

In this section, you must provide an outline of your proposed plan of work. You should try to give a clear sense of the fundamental research question. As far as possible, please use the headings below to formulate your response.

1. **Working title (mandatory):** This should express the main area of investigation, implying its questions and potential argument or standpoint.
2. **Subject area, aims and objectives:** Define briefly your subject and the main concerns of the investigation, including a set of aims and objectives that will guide your research.
3. **Historical context:** There is no single history that suits all investigations but you should identify the various strands of history that relate to your particular research.
4. **Contemporary context:** As far as you are able, define the contemporary work that relates to your field of investigation.
5. **Theoretical context:** You should be able to demonstrate the ways in which you evaluate your own work and that of others, and the sources you use to inform your evaluation. A theoretical context will help you avoid simply asserting a position and support you in the reflective approach that is needed for a research degree.
6. **Methodology:** Describe your research methods.

Continued:

A large, empty rectangular box with a thin black border, occupying most of the page. It is positioned below the 'Continued:' label and is intended for the user to provide a continuation of text or a drawing.

Brief bibliography:

Works that are important in your intellectual development and those that may inform your research project. You may be asked about them if you are interviewed. You may continue on a separate sheet (maximum 1).

Declaration
