

University College Falmouth launches specialist garden and landscape courses

University College Falmouth is to offer new **Masters level, CPD and short courses** aimed at designers, practitioners, and anyone interested in the future of gardens and landscapes both in the UK and abroad.

Falmouth's highly successful undergraduate degree in Garden Design has produced the Society of Garden Designer's Student of the Year, two years in a row. Building on this reputation, an internationally unique programme of courses will be taught by leading professionals, practitioners and academics from the worlds of landscape architecture, garden design, horticulture, architecture and design, in collaboration with industry, public sector organisations and key research establishments. It creates a unique opportunity for students to develop new interests that form and respond to specialist markets, and pioneer new gardens and landscapes within an academically rigorous environment.

University College Falmouth welcomes applicants from all backgrounds.

Please tick the areas that interest you below and send to: Richard Sneesby, University College Falmouth, Tremough Campus, Penryn, Cornwall, TR11 5PW.

For further information visit www.falmouth.ac.uk, email admissions@falmouth.ac.uk or telephone Admissions on 01326 213730.

Thank you.

Richard Sneesby, Course Leader, Landscape and Garden Design
